Capstone Course Final Project Report
Air & Water Customer Service Evaluation

Feature List

There are two parts to this application: a control panel (dashboard.php), and an evaluation page (index.php).

Front end:
- Side menu links on control panel: Dashboard, Settings, Questions, Tests, Reports
- Simple evaluation home page should display stored questions
- Simple evaluation home page should allow for questions to be answered
- Both control panel and evaluation page have some level of responsiveness.

Back end:
- Admin login/logout
- Admin password reset
- Edit email address used for notifications
- List of questions
- Add a question
- Edit an existing question
- Delete an existing question
- View list of interviewees that have completed the test
- Store time elapsed for the evaluation
- Each answer associated with the question will be stored
- Email notification when a test has been completed

Note: Lines in gray are features that have not yet been implemented.
Known bugs: questionID and testID do not get reset when the row in the database gets deleted unless you force "ALTER TABLE tablename AUTO_INCREMENT = 1" on delete.

How to test

1. Run **timed_interviews.sql** to create the proper database and tables with pre-inserted values to start.
   a. Database name: timed_interviews

b. Tables: settings, questions, tests
2. Go to: **localhost/timed_interviews/login.php**
    a. Username: admin
    b. Password: admin
3. Go to the "Settings" page using the left navigation menu
    a. Change the password
    b. Enter a new email address
4. Go to "Questions" page using the left navigation menu
    a. You can view a list of existing questions
    b. Add a new one by clicking on the 'Add New Question" button and filling out the fields. Click "Save". Clicking "Cancel" will empty the fields and hide the add question div.
5. To test the evaluation page, you can go to: **localhost/timed_interviews/index.php**
    a. Fill out your first name, last name, and click begin.
    b. Click the "Continue" button to keep going through the test until you click on the "Finish" button.
6. Go back to the control panel and into the tests page using the left navigation menu
    a. See that your newly completed test shows up in the list
